V5-NTG5-PNP

v.LOGiC V5 Camera Interface for Mercedes Audio20 and COMAND Online NTG5/5.1

Features

- Rear view camera input
- Front view camera input
- Video In Motion
- Made in Germany
- USB updatable
- 100% Plug and Play

Compatibility & Product Features

- Mercedes Audio20 and COMAND Online NTG5/5.1 devices (S-Class W222 not supported)
- Plug and Play Camera Interface with controls by factory infotainment
- Own on screen display and setup
- No coding required
- 1 Rearview camera input with dynamic lines support
- 1 Frontview camera input
- Automatic switching to rearview camera input on engagement of reverse gear from all operation modes
- Manual switching to rearview camera
- Manual return from rearview and front camera (cancellation of automatic switching)
- Picture in picture mode combining aftermarket rearview and front camera picture(s)
- Compatible with all factory video accessories (e.g. Rear view camera, TV-tuner)
- USB update-port for software updates by consumer

The v.LOGiC Media Controller allows to connect a Rearview camera with dynamic lines support as well as a Frontview Camera to the OEM screen.

Camera functionality set to intelligent mode simulate to the user OEM operations. It switch automatically between both cameras depending on shift box or PDC status as well as car speed.

(We accept no liability for changes, mistakes or printing errors.)
